

## Subject Matter Index

### A

- A Theory of Justice*, John Rawls 31, 110  
    compatibility with Aristotelian thought 254  
    Kantian constructivism 36  
    Nussbaum's objections 34, 37, 227, 254–255, 384–385  
    reflective equilibrium and perceptive equilibrium 254  
    Sen's objections 384–385  
    untested intuitions, experimental philosophy's problems with 126  
    veil of ignorance 415
- Abablali Basemjondolo* 22, 327–328, 442–444
- abortion, *see also* termination of pregnancy 289–290, 400–401, 418
- Ackerman, Bruce, constitutional moments 73, 208, 243, 308, 481
- Ackermann, Laurie 415  
    court's initial rejection of his classical liberal account of freedom  
        court vindicates his connection of negative liberty to equality and dignity  
        debt to kant 414  
    equal concern and equal respect 394  
    privacy and dignity 418  
    self-actualization 395
- active citizenship 279, 327, 462
- affiliation, freedom of 386
- association, freedom of 11, 34–36, 68, 183, 246–247, 293, 386, 392, 400, 412, 416–417
- Affordable Medicines* 395, 416
- African National Congress ('ANC') 222  
    elites 251  
    centralization of power in NEC, and over various arms of the state 277  
    complex agenda: egalitarianism, utilitarianism, democracy, ubuntu, communitarianism  
        dominance over Kwa-Zulu Natal politics blocks provincial constitution 277  
    grassroots politics 333  
    need for new deal 308–309, 505  
    old deal, with business and labour, and peaceful transition 308  
    one party dominant democracy 489

- opposition to capital punishment 293
- public school policy 333–334
  - rejection of exclusionary practices 335
- Reconstruction and Development Programme 363
- rejection of dignity qua group politics 403
- rejection of group rights (designed to protect minority interests) 333
- white papers on education 363–364
- african traditional law *see* customary law
- african widows 446–451
- Afrox* 286, 312, 500
- Against the Rules*, Public Protector 275
- agency qua individual freedom and free will 52, 92, 114, 397
  - choice 119
  - morality 115–116, 387
  - psychological state 86–87
  - responsibility 117
  - strong metaphysical account of individual agency, free will, as grounds for a constitutional democracy and untoward consequences thereof 22–23, 31
    - classical liberalism and strong metaphysical commitment to free will and individual agency 22, 31–34
    - liberal democracy and strong metaphysical commitment to free will and individual agency 22, 34
    - misguided notion of 22–24
    - social democracy and strong metaphysical commitment to free will and individual agency 22, 34
- Abmed Asruff Essay/Juma Masjid* 263–264, 470–474
- Albertyn, Cathi 32, 75, 243–247, 290–292
- Alexandra floods 227–228, 323–324, 436
- American Revolution 401, 504
- amnesia 98–99, 129
- Anne Frank and lying (or truth-telling) 112
- Anti-Retrovirals or ARVs 433–434, 484
- anti-semitism 112, 405–406
- Appiah, Kwame Anthony
  - diversity and cosmopolitanism, defense of, as compared to Sen 419–420
  - experimental turn in philosophy 84
  - Experiments in Ethics* 10, 124
  - is/ought distinction, exasperation with 6
  - moral, political and legal beliefs subject to experimentation, analysis and proof 226
  - trolley car experiments 85

Aristotle

- dependability of beliefs, direct contact with objects in the world 226
- flourishing 228–229
- heterogeneity of goods 229
- moral virtue and habit or custom 225
- Nicomachean Ethics* 253
- practical wisdom 225
- reflexivity 226
- rejection of Plato, Idealism and Rationalists 225
- relationship between dignity and flourishing 392
- successful action, experiments, as part of reason and virtue 226
- wealth, not a good, but only useful for some other good 396
- assembly, freedom of 37, 113, 145, 245, 300, 385, 386, 392, 399–400, 417
- Auditor-General 272–274, 293
- August* 279–280, 395
- autonomy
  - and moral culpability 24
  - autonomy trap and moral stigma 117
  - classical liberalism 33
  - collective action, overcoming problems of – through choice improvement via sharing experience, pooling information, prompt feedback and feedback mechanisms 63
  - Constitutional Court's failure in *Case & Curtis* 142
    - but see Yvonne Mokgoro's dissent 143
  - Constitutional Court's failure in *De Reuck* 118
  - Constitutional Court's failure in *Jordan 23*, 118
  - Constitutional Court's failure in *Prince* 118
  - Constitutional Court's improved understanding in *Khosa* 36, 119, 142, 396–397, 399, 409, 416
  - cultural autonomy 211, 332, 338
  - failure of metaphysics of traditional conceptions of autonomy, free will 23–24
  - Fay, Brian, on happiness vs autonomy 249
  - flourishing supplants metaphysics of autonomy 36
  - freedom requires restrictions on autonomy 33
  - Lincoln, Abraham, democracy is the condition of autonomy 413
  - linguistic autonomy 212, 332
  - Locke, John, no freedom without law 64
  - metaphysics of free will 7
  - misattribution 14
  - opposing conceptions 7
    - determinism vs free will 14
    - experimentation vs deliberation 14
    - flourishing vs freedom 14
  - over-dramatization of 24
  - provincial autonomy 308

reproductive autonomy 220  
school governing body autonomy 337–354, 363  
substantive autonomy  
    feminism, equality 406  
    Pueblo law, *Santa Clara Pueblo v Martinez* 406  
awareness and action 88

## B

Baars, BJ  
    ‘How Does a Serial, Integrated and Very Limited Stream of Consciousness Emerge from a Nervous System that is Mostly Unconscious, Distributed, Parallel and of Enormous Capacity’ 38, 72, 80, 99, 128  
    *In the Theatre of Consciousness: The Workspace of the Mind* 72, 130  
    global workspace theory 65, 67, 69, 100–102, 107  
Baker, GP 46  
Basson, Ernst 437  
Being 44, 504  
    ‘Being in the world’ 4, 11, 26, 38, 39, 48, 54, 58–59, 60, 64, 66, 84, 113, 116, 118–119, 122, 148, 149, 156, 173, 175–176, 217, 219, 224, 246, 256, 260, 334, 382, 385, 388, 390, 392, 396, 402, 480  
Being, ‘unchosen conditions’ of 44, 52, 148, 149–151, 504  
Bengu, Sibusiso 210–212, 332, 332, 351  
Berlin Wall 401  
best fit 63, 64, 80  
*Better Life Index* 397  
*Bbe* 407–408, 446–451  
big five values – openness, democracy, human dignity, equality and freedom 267  
Bilchitz, David  
    dark side of social capital 183  
    discrimination by religious associations 31  
    discrimination in the private sphere 31, 240  
    law as theory and practice 241  
    minimum core  
        theory of 485  
        perverse, unintended consequences of failure to recognize core 330  
    poverty 36, 411  
    problem of radical egalitarianism in pluralist society 35–36  
    right to health 297–298  
    socio-economic rights, of disadvantaged 40  
Bill of Rights 29, 203, 267, 268, 333–334, 409, 475, 477, 478  
    US Bill of Rights 263  
Bishop, Michael  
    *Blue Moonlight* 360  
    costs 284–285, 312

- discretion to hear matters, Constitutional Court 311
- meaningful engagement 296, 460, 463
- Merafong* 357, 445–446, 489
- Public Protector 305
- rationality review 315
- remedial equilibrium 57, 218
- remedies 248
- rights essentialism 218
- Rivonia* 377
- school funding, adequacy of education 257–258
- servitude 491
- sexual slavery 34, 163, 218, 282, 445, 446, 460, 463
- shared constitutional interpretation, death row cases 282
- supervisory orders 282
- black economic empowerment 403
- Blackmore, Susan
  - arguments against the unitary supervisory self 68, 92
  - awareness of intention and brain disposed toward creating sense of intentionality 89
  - consciousness 76, 128
  - experiments show both that non-conscious neurological events precede conscious
    - thumb on nose experiment: engages visual cortex (V1), Wernicke's area
    - motor cortex, sensory cortex and shows *no central headquarters* where all the information is directed 94–95
  - global neuronal workspaces 61
  - multiple drafts, how content of consciousness is regularly revised 137
- blind-variation-and-selective-retention processes 164–166
- Blue Moonlight* 271, 331
- bodily integrity 385
- Bogosbi* 474
- bonding networks 8, 57, 154–155, 172
- bottom up solutions vs top down command 239
- Bourdieu, Pierre 152–153
- brains
  - archaic neurological basis of deontological thought 20
  - categorize events 5
  - cognitive closure, brain cannot explain how it gives rise to consciousness 38
  - component parts, required for consciousness 53
  - computer chip implants 10, 121
  - decoding activity from third person perspective 11
  - mapping 88
  - navigate causal world 5
  - neural networks 61, 67, 70, 100–101, 104–108, 114, 131, 135, 159, 176, 186, 197
  - powerful problem-solving mechanism 26

readiness potential, 0.8 neuronal activity prior to conscious awareness of action split *see* split-brain

*The Concept of Mind*, Gilbert Ryle 19

anti-dualist argument, mind as category mistake 19

application of category mistakes to metaphysics and constitutional law 19

category mistakes 19

utilitarian thought, prefrontal cortex 68, 99, 103

Brand, Danie 286

Brazil 215

*Breaking New Ground* 270, 432, 463

Brickhill, Jason 296, 460, 463

bridging networks 8, 74, 148, 154–155, 172

Budlender, G 223

bundle theory 104

Bush, George W 169

## C

cafeteria design and choice architecture 170

Campbell, Donald, 8

blind-variation and selective-retention processes 54, 73, 164–166

downward causation 157–159,

evolutionary epistemology 8, 164–167

Capabilities Approach 24, 224, 393, 397

capital theory 504

capital, social as economic, Bordieu 152

caring (relational) self 111–112

as neurological endowment in women, oxytocin 111, 139

in men, diminished testosterone 111–112, 139

work of Carol Gilligan 111, 139

work of Dorothy Dinnerstein 139

work of Patricia Churchland 111, 139

*Carmichele* 400–401, 476

Cartesian

ego 104

error 348–351

notion of self 64–65, 80, 84, 92–94, 115

theatre 88, 92–97, 100–101

category mistakes 94

Cele, Bheki 275

Centre for Applied Legal Studies 325

centre of narrative gravity 66, 67, 92, 106–107, 114, 388

Chalmers, David

‘hard questions’ – unanswered – about consciousness 10, 135, 145

argument from cognitive closure 38

- need for interdisciplinary analysis in consciousness studies 11
- New Mysterians 10, 120–121, 124, 145
- qualia, absent qualia, hard questions about qualia 135
- subjective experiences, not subject to third person accounts 136–137
- Chapter 9 Institutions 271–277, 290–292
- Chaskalson, Arthur 324
- chastened deliberation 214, 238, 260
  - and *Joe Slovo I and II* 465–466
- Chayes, Abraham 216
- chess 63
- Child Law Centre* 211, 280–282, 355
- child welfare systems, in US 234–236, 355
- Chipkin, Ivor
  - constraints on public service 252
  - institutional undercapacity 223
  - social cohesion 75, 184
- choice 23, 116, 156, 391
  - and autonomy 23–24
  - and conflict 156
  - and prostitution 429
  - and sexual slavery 429
  - curtailed 119–120
  - lack of 149–150
  - myth of 44–45
  - rational 117
- Choice architecture 4, 6, 55, 122, 168–169, 504
  - cognitive biases in deliberative practices 168
  - overcoming cognitive biases 169
- Choudhry, Sujit
  - One party dominant democracy 222, 250, 489
- Churchland, Patricia 66
  - fact/value distinction, naturalistic fallacy 5–6, 9–10
  - hybridity of morality and political theory 411
  - materialism, 3rd party perspective 39
  - oxytocin and maternalization of the brain 111–112
  - oxytocin, neuropeptide, intranasal delivery, caregiving in men 111–112, 139–140
  - women as hard-wired for caregiving, oxytocin 111–112, 139–140
- civil rights 59
- civil society 209
- civil wars 401–402
- class sizes 345–346
- classical liberalism 8, 22, 31, 33, 159, 256, 388
- climate change as feedback 178–180
- clout 107

- coercion 57, 408, 450  
 into sex work 23, 118–119
- cognitive biases 169–172
- cognitive closure (consciousness cannot explain itself) 120, 121
- Cohen, Joshua 47, 199
- cold war 383
- collective self-reliance 3
- colours as qualia 120–121  
 four pure colours: yellow, blue, red, green 120  
 Locker's error 120  
 no inverted colour scheme 120  
 not incontrovertible, third person perspective 120–121
- Commission for Gender Equality (CGE) 290–292, 450
- common law 156–157  
 as feedback mechanism 158–159
- common world 45
- commons 3
- communitarianism 35
- 'communitarian shuffle': elision of difference between the polity and other communities that make up a society leads to unwarranted privileging of political community over other communities, failure to recognize conflicts between communities that source our radically heterogeneous 35
- community rights 453–454  
 and autonomy of 333–334  
 and flourishing 401–408
- compatibilism 82, 85, 115
- complementarity 276
- consciousness  
 as feedback mechanism 122–123, 155, 159  
 Cartesian vs experimental 350  
 cognitive closure and the New Mysterians 121  
 conditions for consciousness 102, 104–105  
 constitutional doctrine 117–118  
*function* of neuromuscular system (1) primarily unconscious, (2) distributed throughout the brain and the body, (3) engaged in multiple parallel processes, and (4) of enormous, highly under-utilized capacity 25, 51  
*functions primarily as feedback mechanism* that gives us fresh opportunities to reflect upon experience and plot more or less optimal courses for action 47–48  
 location of 84, 93, 114  
 multiple selves and error correction 155  
 need for 103  
*purpose* (a) durable and explicit information maintenance (b) novel combinations of operations and (c) intentional behaviour 25, 51, 105–106

- relationship to constitutional democracies*: densely populated communities with millions of complex, heterogeneous selves constantly experimenting, attempting to divine through action and reflection, what works best for majority of constituents 80
- shared 175–180
- theories of 349–351
- understanding function* and *purpose* sheds light on core concepts of constitutional theory – ‘individual moral agent’ and ‘political freedom’ 52
- vs non-conscious neurological events 88–90
- vs unconsciousness 49–52
- consequentialism 109–110
- Constitution
  - and common law 477
  - as lived, experienced 260–261
  - Interim 262
- Constitutional Court 205
  - flexibility of interpretation and remedies 265
  - rules and procedures of 283–285
- constitutional damages 270
- constitutional jurisdiction 286–287
- constitutional supremacy 60
- constructivism 26, 385
- continuous improvement 202
- control over one’s environment 386
- Cornell, Drucilla
  - customary law 257
  - Defending Ideals* 37
  - Kant’s concern, not actual metaphysical freedom, but ethical imperatives 416
  - uBuntu and dignity 416
- corporations and climate change 177–180
- corruption 274
- counter-majoritarian dilemma 268
- Cover, Robert 208
- core self 98
- Crick, Francis 104–105
- critical reflection 389
- crowd action 400
- culpability vs intentionality 87
- cultural autonomy 211, 333–338
- cultural communities 453–454
- culture
  - and education 333–338
  - community rights 405
  - development of 157–158

Currie, Iain

indirect application and direct application 251

judicious avoidance (as a uniquely South African form of minimalism) 40–41

customary law 407–408, 446–451, 455–457

Czechoslovakia 401

## D

Damasio, Antonio

autobiographical self (similar to centre of narrative gravity, but retains first person account of unitary self) 98–100, 115, 129, 136, 141

core self 98–99

proto-self 98, but *see* Dennett 129

*Daniels* 173

dark energy 349

Davidson, Donald

against conceptual schemes 19, 143

against Rorty and contingency 224

error, gives belief and truth its point 46, 69, 213–214

perceptual and cognitive faculties, basically dependable 226

truth, unmediated 18

understanding the world is parasitic on ‘endless true beliefs’ 253

*Dawood* 394

*De Renck* 118

death penalty 282, 394

decentralization 204

decision-making 202

defamation 474

Dehaene, Stanislas (and Lionel Naccache)

‘the architecture of the human brain comprises a distributed neural system or ‘workspace’ with long-distance connectivity that can potentially interconnect multiple specialized brain areas in a co-ordinated though variable manner’ 80, 102–106

‘Towards a Cognitive Neuroscience of Consciousness: Basic Evidence and a Workspace Framework’ 67, 69, 72, 128–129, 131–134, 138, 197, 240

‘trial and error’ within the simulated framework of mental activity 116

Dehane and Naccache’s global neuronal workspace theory 80, 102–106

purpose of consciousness: evolutionary advantages that this system confers to the organism may be related to the increased independence it affords; the more an organism can rely on mental simulation and internal evaluation to select a course of action, the *lower* the risks of subsequent action and the expenditure of energy, and the greater the likelihood of regular successful action and higher the chances of survival 240

selves and heterogeneity 107

deliberation 44, 168, 208

Davis, Dennis 36

- Habermas, Jurgen, ideal speech situations 36  
 limits of *see* chastened deliberation  
 vs experimentation 14
- Democratic Alliance v ANC & Others* 287
- demarcation 22, 444–446
- Dennett, Daniel 38  
 arguments against Cartesian Theatre 94, *see* Blackmore's arguments 94  
 blind-sighted subjects 103  
 centre of narrative gravity 44, 66, 106–107  
 similarity with, but preferable to, Walzer's 'densely populated me' 66  
 chastened, forward-looking account of freedom, role of trial and error 116  
 Conscious beliefs: 'idealized fictions', 'action-predicting, action-explaining calculus'  
 25–27, 193  
 Consciousness as risk limiting, not risk eliminating 26  
*Consciousness Explained* 6–7, 67, 137–138, 187  
 Damasio's autobiographical self, similarities and differences 129  
*Elbow Room* 138  
 flourishing pace free will 27  
 free will as functional phenomenon, pace individual responsibility 26–27, 87  
*Freedom Evolves* 67, 138, 140, 240, 481  
 global workspace theories of Baar, Dehaene and Naccache, similarities 135  
 multiple competitions, winners as consciousness, extinguished (not forgotten) stimuli 73  
 naturalist account preferred to dualist account 136  
 nature of chastened account of freedom 27  
 readiness potential, as intention, precedes conscious awareness (.08 seconds) 88  
 selves and heterogeneity 107  
 situated self 388  
 socially, radically heterogeneous, determined selves 108  
 successful action over deliberation 187  
*Sweet Dreams* 67, 72, 136  
 thought experiments, trial and error, feedback mechanisms: features of consciousness 7
- deontology 109–110, 114  
 deriving an ought from an is 4–6
- Descartes, Rene *see also* Cartesian 84, 93, 97
- desperate situations, persons in 269
- destabilization rights 163, 215–217, 238–239  
 and *Joe Slovo I* and *Joe Slovo II* 465–466
- determined self 64–65, 80
- determinism 14, 80–81, 82–83, 115
- Development as Freedom* 34, 36, 37, 72, 110, 139, 140, 256, 398
- Dewey, John  
 pragmatism,  
 anti-essentialism, against transcendental truth 45, 203  
 experimental constitutionalism 198–200, 203, 383

- Reconstruction in Philosophy* 68, 186  
 reflexivity 241  
 thought qua problem-solving 1  
 wooliness, problem of (pragmatism) 383
- Dickerson* 206–208, 262, 348
- Didcott John 401
- dignity 113, 385, 393–394  
 and death penalty 409  
 and democracy 267–268  
 and eviction 461  
 and flourishing 392–393, 395, 397–399  
 and freedom 22  
 and voting 395, 398  
 constitutional right to 24  
 vs equality 450
- disability 55, 113, 216
- discrimination 219–220, 404–405  
 freedom from 396  
 justifiable 454
- disentrenchment of established interests 39
- disentrenchment of private ordering through remedial equilibration 205, 217–221, 260, 282, 387, 408, 428
- disentrenching power, law has inherent, RM Unger 216, 246, 492
- disentrenching rights – ‘destabilization rights’ in public law litigation reflect rights to disentrench an institution that has systematically failed to meet its obligations and remained immune to traditional forces of political correction 231  
*see* Drug Treatment Courts 238
- disruption 149
- distance 109, 109
- diversity 175
- divided self 65, 80
- Doctors for Life* 289–290, 445
- doctrine revisited vs applied 457, 459–460
- dominance 218
- Dorf, Michael  
 ‘A Constitution of Democratic Experimentalism’ 40, 75, 204, 241, 242, 249, 256–257, 379, 481  
 ‘Drug Treatments Courts and Emergent Experimentalist Government’ 7, 199, 236–239, 244, 258, 278, 342, 348, 354, 383, 428, 482, 495  
 ‘Legal Indeterminism and Institutional Design’ 75–76, 294, 482  
 ‘Shared Constitutional Interpretation’ 40, 75–76, 243, 249, 481, 483  
 ‘The Limits of Socratic Deliberation’ 255, 294, 349, 481  
 actors most immediately affected by political policies or judicial edicts have a better chance of fixing what is broken 223

- basic facts of experimental constitutionalism 204
- courts, legislatures, executives and an active citizenry share responsibility
  - for interpretation of constitutional provisions in terms of broadly shared understandings 7
- critique of experimentalism's (apparent) absence of core norms 202
- drug treatment courts 236–239, 297–298
  - changed normative view of drug possession and drug use 239
  - chastened deliberation 238
  - lateral and forward looking 237
  - radical reformation 238
  - unearth powerful potential of reflexivity 237
  - reflect basic facets of polycentric decision-making under specialized, ongoing court supervision 236–239
- emphasizes on-going stakeholder negotiation, continuously revised performance measures, and transparency 231, 233
- empiricism 7
- feedback mechanisms 8
- lack of accountability *prima facie* grounds for employing experimentalist practices, by involving parties most deleteriously effected by a broken political system 357
- Miranda* and *Dickerson* explain how shared constitutional interpretation works 206–208
- most broken of systems benefit the most from the reflexivity of experimentalist feedback mechanisms 233
- norms set at a relatively high degree of abstraction enable co-ordinate branches of a central government, various agencies, different states or provinces, municipalities and innumerable private parties and stakeholders to undertake alternative approaches, experiments, or potential solutions to the problems thrown up by constitutional litigation 7
- original exponent of experimental constitutionalism 7
- politics, government solving practical problems *with* and *for* the people 199–204, 240
- pragmatism and life as series of constant disruptions 256
- pragmatist insights from business management theory 349–350
- problem of unstated social democratic pre-commitments and experimentalism 203, 382
- reflexivity embodied in the idea of very general, centralized standard-setting, localized experimentation, and rolling implementation of best-practices 221
- remedies, rolling rules regime 357
- spinning web of social networks, experimentalist, polyarchic governance 357
- trial and error 348
- downward causation 157
- driving example 49–50, 101–102
- driving, trial and error 123
- drug treatment courts, in US, 236–240, 355, 428

     mechanisms and trial and error 47–49

feedback mechanisms (*see also* trial and error)  
     as intuition pump 17–18  
     Auditor– General 273  
     chastened deliberation 214–215  
     *choice architects*, construct experiments that act as feedback mechanisms 58  
     connection between theories of consciousness and constitution theories 4, 80–81  
     consciousness, feedback mechanism that enhances flourishing 122–125  
     Consciousness functions as a feedback mechanism 48 (*see* glossary)  
     Consciousness, result of competing, and yet co-operative, feedback mechanisms 115  
     conservative view of *stare decisis* blocks rights-based feedback 286  
     constitutional democracy as feedback system that enables a polity comprised of millions  
         of complex, radically heterogeneous selves to experiment, attempting to divine  
         through reflection and action what works best for its many constituents and enables  
         them to flourish 50  
     corporations and climate change 177–180  
     education reform 233  
     *experimental constitutionalism*, describes various governmental feedback mechanisms 62  
     experiments – and the feedback we receive – improve our chances at arriving at better  
         answers over time to questions – factual and normative – that require a more or less  
         immediate solution 7  
     experiments provide feedback, for better or worse 49  
     *extant feedback mechanisms* – individual dispositional states and social practices 52  
     golf instruction 176–177  
     human brain is an extraordinarily powerful problem-solving mechanism; its uniqueness,  
         compared to other sentient life, adheres in its ability to address apparently

- insurmountable obstacles through complex neurological feedback mechanisms that enhance our ability to engage in abstract, future-oriented thought and action-predictive behaviour 26–27
- in driving 123
- in music 124–125
- in spelling 124

        244, 258, 278, 342, 348, 354, 383, 428, 482, 495  
    actors most immediately affected by political policies or judicial edicts have a better  
        chance of fixing what is broken 223  
    basic facts of experimental constitutionalism 204  
    best practices are forward and lateral looking 201  
    child welfare agencies 234–236  
    inapt comparison to South African socio-economic rights jurisprudence 236  
    critique of experimentalism’s (apparent) absence of core norms 202  
    drug treatment courts 236–239, 297–298  
    chastened deliberation 238  
    lateral and forward looking 237  
    polycentric decision-making under specialized, ongoing court supervision 236–239  
    radical reformation 238

- unearth powerful potential of reflexivity 237
- education litigation and polycentric reform 231–234, 258
- emphasizes on-going stakeholder negotiation, continuously revised performance measures, and transparency 231, 233
- empiricism 7
- lack of accountability *prima facie* grounds for employing experimentalist practices, by involving parties most deleteriously effected by a broken political system 357
- politics, government solving practical problems *with* and *for* the people 199–204, 240
- pragmatism and life as series of constant disruptions 256
- pragmatist insights from business management theory 349–350
- primary exponent of experimental constitutionalism 7
- most broken of systems benefit the most from the reflexivity of experimentalist feedback mechanisms 233
- remedies, rolling rules regime 357
- spinning out web of social networks, experimentalist, polyarchic governance 357
- Sachs, Albie
  - ‘open and democratic society’ faced with seemingly intractable conflicts – between the state and religious communities – requires ‘reasonable accommodation’ of interests 295
  - Change occurs through the regular confrontation with ways of being in the world that are not like our own default positions 175
  - Constitution as radical rupture with repressive past – promotes tolerance, acceptance, mutual respect 174–175
  - egalitarian pluralist selves, and mutual recognition, leads to democratic solidarity 390
  - greater sensitivity to the variability of the human kind leads to democratic solidarity 173
  - right to be different 174, 366
  - meaningful engagement as ‘two-way street’ (piazza a better metaphor?) 327
  - misunderstands minimalism 46
  - multiculturalism 364–365
  - political community can only remain free if it values plurality and difference, and allows out-groups to disturb and to challenge deeply held majoritarian beliefs and practices 295
  - radically heterogeneous self and *Fourie* 390
  - radically heterogeneous selves and radically heterogeneous communities challenge normative closure 174
  - rights ‘interdependent’, ‘overlap’ and ‘interpenetrate’ *Sidumo* 408–409
  - self-governance, *August* 395–396
  - views on democracy consistent with Theunis Roux’s reading of constitutional text 296, 395, 408–409, 461–462
- Sager, Lawrence 218
- same-sex marriage 404–405, 451–455
- Sanderson* 218–219
- Satchwell I* and *II* 206 262
- school fees, exemption from 345, 347

- school governance, learner participation 342–343

- radically heterogeneous determined 108–114
  - natural 108–114
  - social 108
- situated 388
- theories of 49–50, 80, 349
- types of 388–390
- selfhood 97, 98, 114–115, 121
- Sen, Amartya
  - 'More Than 100 Million Women are Missing' 72, 257, 384, 412
  - (socio-economic analysis of misogynist cultural and political practices in East Asia, South Asia, Sub-Saharan Africa and South America explains why, 20 years ago, the world's human population contained 100 million fewer women than, according to genetically-determined birth rates, it should) account of dignity, equality and freedom provides the best fit for these ostensibly 'three conjoined, reciprocal and covalent values' and this book's ultimate commitment to flourishing, *see Mamabolo* 36
  - adaptive preferences 228–229
  - approval of Smith's *Theory of Moral Sentiments*, and the requirement that a just society must enable citizens to 'appear in public without shame' 37, 113, 379, 385
  - as with experimentalists cum pragmatists, no priority of norms pre-exist lived reality 257
  - contemporary notions of flourishing emphasize the radically heterogeneous, adaptive and reflexive, nature of what it means to 'pursue lives worth valuing' 113
  - Development as Freedom* (also 'development as freedom') – requires provision of a basic, but variable, basket of goods, real and figurative, that enable human beings to develop those capabilities necessary for each individual to pursue lives that each has reason to value 24, 34, 36, 37, 72, 110, 139, 140, 256, 398
  - development theory 8
  - discrimination necessary for meaningful collective action by associations 420
  - diverse satisfaction constraints and adaptive preferences 240
  - grounds for rejecting utilitarianism 36–37
  - grounds for rejection of Rawls, especially failure to account for difference 36–37, 254
  - group identity scepticism 404–405
  - heterogeneity amongst individuals (both within societies and across societies) shapes the meaning of primary goods *and* incomes 113
  - Kbosa's* constitutional rights as a collective concern, similar to material and immaterial goods required for just social order in Sen's development theory 24
  - like Sen, book maintains commitment to ensuring that people can *pursue* lives worth valuing: through the maintenance of existing arrangements, the creation of more hospitable social formations or the improvement of the material conditions of being 77

- link between individual capabilities and development is part of a virtuous circle, enhancement of individual flourishing – by both political and material means – leads to greater social development, which, in turn, further enhances the possibilities for individuals to lead the kinds of lives we have reason to value 397
- lobolo 421
- no univocal understanding of the good 24
- purpose of wealth, not for its own sake, but the expansion of the ‘capabilities’ of persons to lead the kinds of lives they value – and have reason to value; having freedom to do the things one has reason to value is (1) significant in itself for the person’s overall freedom, and (2) important in fostering the person’s opportunity to have valuable outcomes 397
- questions Wittgenstein’s commitment to asceticism and absolute clarity 8
- refuses abstract definitions of equality or freedom or dignity – best measure is the ability of individuals to *convert* such primary goods as *income* or *civil liberties* into the capability ‘to choose a life one has reason to value’ 385
- rejects acritical, homogenizing communitarianism, *see* communitarian shuffle, 389
- shared normative understanding of the optimal choice environment is a necessary precondition for a just political order 240
- theory of distributive justice shows how the heterogeneity amongst individuals (within societies and across societies) shapes the meaning of primary goods and incomes) 385
- virtuous circle of development 397
- with Nussbaum, two modern (covalent) definitions of flourishing: development and capabilities 384–387

Sturm, Susan

- courts as catalysts 228
- deliberation can lead to greater polarization of positions 208, 243, 255
- limited institutional competence, legitimate, ought not dictate deference 320
- primary exponent of experimental constitutionalism 7
- problem of anti-foundationalism associated with pragmatism 203
- but *see* 'Second Generation Employment Discrimination: A Structural Approach' on creative remedial responses to systemic problems, *see* 'The Promise of Participation' 243, 255, 294, 264, 320

substance dualism 93

suffering, not turning away from, baseline justification for dignity, post-apartheid 397–399

Sunstein, Cass

- 'libertarian paternalism', thesis born of the false assumption almost all people, almost all the time, make choices that are in their best interest, an lays ground for choice architecture and social and political experimentation 63
- choice architects must understand (a) the defaults or the heuristics that take the inherent bias toward repetitive behaviour (laziness) into account so that the default or the heuristic in a system is (re)set toward the outcome likely to enhance the individual's and the group's welfare; (b) must construct feedback mechanisms that allow individuals (1) to learn from their behaviour and to make better or more optimal choices when faced with a similar environment in the future; (2) to send clear error signals so that individuals see what works and what doesn't; (3) to frame complex choices in a manner that enables participants to compare potential outcomes 64
- choice architecture examples
  - school district official in charge of constructing 'healthy' cafeterias 170
  - large black fly on a urinals in airport increased accurate 'aim' by 80% 170
- choice architecture improvements may only incrementally alter an experimentalist society, but the cumulative effect of myriad experiments can be revolutionary 171
- choice architecture, *Nudge: Improving Decisions about Health, Wealth and Happiness* (with Richard Thaler) 8, 63–65, 73–78, 191
- cognitive biases in deliberative practices: (1) negative informational influences
  - (a) attributive biases (over-valorization of own knowledge); (b) cognitive biases; (c) heterogeneous interests; (d) inertia; (2) social pressures: (a) yielding to the big dog in the room (b) desire to advance up within hierarchy; (c) herd following 53–55, 168–169
- evidence of bias in 3 judge US federal circuit panels 73
- feedback mechanisms, eg, golf and putting 63, 76
- human preferences adaptive, alter the environment and one can shift expectations and change behaviour, *see* also reflexivity and optimality, *see* Sen 221, 227–228
- heterogeneity of goods with and amongst individuals 229
- Infotopia*, develops a powerful critique of deliberative politics as a constructive form of collective decision-making; identifies four basic forms of contemporary information pooling (1) statistical averages; (2) deliberation; (3) price; or market systems; (4) Internet wikis 169, 191

minimalism, *One Case at a Time* 29–30, 40, 190, 198  
 abjures tendency in legal academy to reify deliberation as a problem solving mechanism 40  
 deliberation can lead to greater polarization of positions, *see* Sturm 208  
 eschews (sceptical of) grand theorizing by courts, in favour of accretion of shared norms, through legislation and case, over time and through experience 29  
 from pyrrhonian scepticism to empiricism 29  
 requires wide-spread shared understandings of social and constitutional norms to get off the ground 29–30, 198  
*see* Robert Post and Reva Siegal, ‘Roe Rage’, backlash when jurisprudence is undercooked 40–41  
 widely misunderstood in South Africa, *see* judicious avoidance, Iain Currie, *see also* Albie Sachs 40, 523  
*Sunward Park* 346

traditional healers 289–290, 457

traditional social orders, communities, associations, forms of life 183, 220, 223–224, 256, 396, 450–451, 456–457  
 new subpublics, counter-publics and non-traditional associations 149, 261, 267, 396, 427  
 vs radical reformation, of forms of life, of ends, of ‘the good’ 208, 223–224, 238, 261

transit camps 324, 436

*Treatment Action Campaign* (‘TAC’) 432–434

trial and error *see* feedback mechanisms  
 and feedback mechanisms 47–49  
 as intuition pump for book, along with feedback mechanisms, 17–18  
 bewitchment of language, mistake about priority of language, successful action prior 49

- Cartesian Error as Manifest in Political and Social Experimentation 348
- central component of experimental constitutionalism 199
- chastened forward looking account of freedom 116–117
- choice architects 4
- collective action (social choices, political policies, legislation, judicial doctrines) 54
- connection between theories of consciousness and constitution theories 80–81
- consciousness as a feedback mechanism (trial and error) for correction that enhances flourishing 122
- constitutional orders are best understood in terms of rarefied basic law that allows scope for trial and error 260
- core components of consciousness and constitutional democracy 4
- Dennett's conception of consciousness turns primarily on its role as a complex set of feedback mechanisms, a capacity that allows human beings to engage in *trial and error* through *simulated thought experiments* and *real experiments* 7
- Department of Education, approach to School Governing Body autonomy 338, 347
- Department of Education, early White Papers for SASA 332
- drug treatment courts, finding treatment that works 239
- education reform 214
- experimental constitutionalism 7
- evolutionary epistemology 164
- genesis of consciousness – thought experiments within the simulated framework provided for by neurological structures offers an enormous advance on having to undertake trials in one's actual physical environment: it enables us to weed out outcomes less likely to be successful and enhances our capacity to survive and to flourish 105
- in Driving 123
- in Golf 178–179
- in Music 124–125
- in Spelling 124
- in Video Games 122
- modesty 81
- narratives, dispositional states, practices, stories remain dominant so long as they bring the thickly populated circle of the self, the social, and the political, success thereof 76
- Patricia Churchland on four interlocking parts of scheme for social behaviour, including learning through trial and error 254
- rover Curiosity, landing on Mars, function on learning from previous errors; confirmed through successful action 46–49, 51
- similarities and differences between neural networks and political processes 292
- successful regular action – in practices, forms of life, language games, ways of being in the world – comes first, as sifted through trial and error (mostly unconscious), then practice itself may be subject to conscious scrutiny through conscious trials, or comparisons with other practices or simulated thought experiments 47
- unsuccessful entry of the Climate Orbiter (crashed) 46–47

Tribe, Lawrence
